Installation

Install the brackets with the screws provided.  
a) recess  b) ceiling  c) wall

Slide the bracket cover onto the bracket until it snaps.  
The fastener of the bracket adapter must be open.

Place the shade with the tube bearing plug onto the bracket.  (1) Push the shade against the idle end and lift the shade up (2).
Line up teeth of motor Plate L with the bracket adapter (A). Turn the shade (10°) in the rolling off direction (1) close fastener on the bracket adapter (2). Make sure that limit switches are accessible on motors.

Secure the shade by turning the locking ring furthest away from the bracket.

Slide the bracket covers onto the brackets. Make sure that the bracket covers snap onto the brackets.
Make sure the bracket cover is on the intermediate plug bracket.

Install the end plug bracket with screws provided.

Slide the screw cover onto the bracket until it snaps.
Installation

Install the main roller shade with the coupling end cap.

Slide the aligner or the connector set through the intermediate bracket into the tube bearing plug.

Press the idle end, lift the roller shade and snap it to the bracket.

Fix the outer bracket with the screws provided.

Shades with custom width gaps or Joint 45° will require 2 intermediate brackets. Slide the aligner or connector set through the intermediate bracket into the tube bearing plug.

To align the bottom rails, push the shade against the idle end (1), turn the shade, level the bottom rail with the other one (2). Release to fix the position (3). Not possible when using connector set.

Slide the cover cap onto the bracket until it snaps.

Place the tube with plug connector on the aligner or connector set head.

Fix the roller shade by turning the locking ring against the idle end.
Installation

Install the main roller shade with the coupling end cap.

Slide the aligner or the connector through the bracket into the idle end.

Press the tube bearing plug, lift the roller shade and snap it to the bracket.

Fix the outer bracket with the screws provided.

Only for coupling with 2 intermediate brackets! Fix the inner bracket (with mounted end cap) with the screws provided. Slide the aligner or the connector through the bracket into the idle end.

To align the bottom hembars, pull the shade away from aligner set (1), turn shade to line up bottom hembars together (2). Release shade to secure position (3). Not possible when using connector set.

Slide the cover cap onto the bracket until it snaps.

Place the tube adapter on the aligner or connector head.

Secure shade band by turning the locking ring on tube bearing plug furthest away from the bracket.
Option: Leveler

Make sure that the opening for the Allen key is pointing downwards before installing the brackets. Change the orientation by loosening the 4 screws and turning the leveler 90°. Reinstall the screws.

To adjust skewing, put the provided Allen key into the screw of the leveler and turn it left or right to move the roller shade up and down. Support lifting of large heavy roller shades with the palm of your hand.

Removal

Slide the bracket cover onto the bracket. Make sure that the bracket cover snaps onto the bracket.

Lift the backside of the end cap and slide it in your direction.

Unfasten the locking ring. Slide a screwdriver between locking ring and bracket and push the idle end in the aligner direction.

Move the roller shade downwards out of the bracket. Pull the aligner or connector out of the idle end.
Connect the motor and all controls in accordance with all safety standards.
Slide the end cap onto the bracket. Make sure that the end cap snap onto the bracket.

Removal

Lift the backside of the bracket cover and slide it towards you.

Option: Leveler

Make sure that the opening for the Allen key is pointing downwards before installing the brackets. Change the orientation by loosening the 4 screws (M5 x 8) and turning the leveller 90°. Fix the screws.

Unfasten the locking ring. Slide a screw driver between locking ring and bracket and push the tube bearing plug in the aligner/connector direction.

To adjust skewing, put the provided Allen key into the screw of the leveller and turn it left or right to move the roller shade up and down. Support lifting of large heavy roller shades with the palm of your hand.

Move the roller shade downwards out of the bracket. Pull the aligner or connector out of the tube bearing plug.
Open both fasteners of the bracket ring. Turn the blind in the roll up direction until the front plate gets out of the bracket ring.

Push the blind against the bearing and slide it out of the bracket.

Disconnect power to the motor. Lift the backside of the bracket cover...

... and slide it towards you.

Unfasten the locking ring.
Remove the locking ring.

Disconnect the motor. Lift the backside of the end cap...

Open fastener on the bracket adapter. Turn the shade in the roll up direction (1) and then pull Plate L out of the bracket adapter (2).

... and slide it towards you.

Push the shade against the tube bearing plug and slide it out of the bracket.

Unfasten the locking ring.
