Loosen both screws and take the crank out of the bracket.

Move the blind downwards out of the bracket.

Slide the end cap towards you.

Unfasten the locking ring. Slide a screw driver between locking ring and bracket and push the bearing in the crank direction.

Press the end cap out of the design bracket. Use a screw driver to remove the screw cover cap from the design bracket.

Open both fasteners of the bracket ring. Turn the blind in the roll up direction until the front plate gets out of the bracket ring.

Lift the backside of the end cap and slide it towards you.

Unfasten the locking ring.

Push the blind against the bearing and slide it out of the bracket.
**Installation**

Install the brackets with the screws provided. 
- a) on face wall  
- b) ceiling  
- c) on frame  
- d) in recess

When using decorator brackets, slide the screw cover cap onto the bracket until it snaps.

Place the tube adapter on the crank head. Press the bearing and lift the blind.

And snap it to the bracket. Fix the blind by turning the locking ring against the bearing.

Place the leveller on the bearing side in the bracket. Make sure that the opening for the Allen key is pointing downwards. Turn the leveller until it clicks.

Make sure that the opening for the Allen key is pointing downwards before installing the brackets. Change the orientation by loosening the 2 screws (M3 x 6) and turning the leveller 90°. Fix the screws.

To adjust skewing, put the provided Allen key into the screw of the leveller and turn it left or right to move the blind up or down. Support lifting of large heavy blinds with the palm of your hand.
Installation

Fix the bracket with the screws provided.

- a on face wall
- b ceiling
- c on frame
- d in recess

Place the tube on to the crank head. Press the tube bearing plug and lift the shade.

Slide the screw cover cap onto the bracket until it snaps. When using design brackets.

Snap it to the bracket. Secure the shade by turning the locking ring furthest away from the bracket.
