Lift the backside of the end cap and slide it in your direction.

To adjust skewing, put the provided Allen key into the screw of the leveller and turn it left or right to move the blind up and down. Support lifting of large heavy blinds with the palm of your hand.

Make sure that the opening for the Allen key is pointing downwards before installing the brackets. Change the orientation by loosening the 4 screws (M5 x 8) and turning the leveller 90°. Fix the screws.

Unfasten the locking ring. Slide a screw driver between locking ring and bracket and push the bearing in the aligner direction.

Move the blind downwards out of the bracket. Pull the aligner or connector out of the bearing.

Slide the end cap onto the bracket. Make sure that the end cap snap onto the bracket.

Install the brackets. Make sure that the leveller is horizontal.

Option: Leveller

Support lifting of large heavy blinds with the palm of your hand.
Installation

1. Slide the screw cover onto the bracket until it snaps. Open the fastener on the clutch bracket adapter (A).

2. Fix the roller shade by turning the locking ring against the idle end.

3. Place the roller shade with the idle end onto the intermediate bracket. Push the shade against the tube bearing plug and lift the shade into the clutch bracket.

4. Slide the end caps onto the brackets. Make sure that the end caps snap onto the brackets.

Option: Leveler

1. Make sure that the opening for the Allen key is pointing downwards before installing the brackets. Change the orientation by loosening the 4 screws (M5 x 8) and turning the leveler 90°. Fix the screws.

2. To adjust skewing, put the provided Allen key into the screw of the leveler and turn it left or right to move the shade up and down. Support lifting of large heavy roller shades with the palm of your hand.
Installation

- Slide the cover cap onto the bracket until it snaps. The fasteners of the bracket ring must be open.
- Place the roller shade with the idle end onto the bracket. Push the shade against the idle end and lift the shade up ...

Option: Leveler

- Make sure that the opening for the Allen key is pointing downwards before installing the brackets. Change the orientation by loosening the 4 screws (M5 x 8) and turning the leveler 90°. Fix the screws.
- To adjust skewing, put the provided Allen key into the screw of the leveler and turn it left or right to move the shade up and down. Support lifting of large heavy roller shades with the palm of your hand.
Install the end plug bracket with screws provided.

Make sure the bracket cover is on the intermediate plug bracket.

Slide the aligner or the connector through the bracket into the idle end.

Press the idle end, lift the roller shade and snap it to the bracket.

Slide the screw cover onto the bracket until it snaps.

Only for coupling with 2 intermediate brackets! Fix the inner bracket (with mounted end cap) with the screws provided. Slide the aligner or the connector through the bracket into the idle end.

Place the tube adapter on the aligner or connector head.

To align the bottom rails, push the shade against the idle end (1), turn the shade, level the bottom rail with the other one (2). Release to fix the position (3). Not possible when using connector set.

Fix the roller shade by turning the locking ring against the idle end.
Installation

Install the main roller shade with the coupling end cap.

Slide the aligner or the connector set through the intermediate bracket into the tube bearing plug.

Press the idle end, lift the roller shade and snap it to the bracket.

Fix the outer bracket with the screws provided.

Slide the cover cap onto the bracket until it snaps.

Fix the roller shade by turning the locking ring against the idle end.

Shades with custom width gaps or Joint 45° will require 2 intermediate brackets. Slide the aligner or connector set through the intermediate bracket into the tube bearing plug.

To align the bottom rails, push the shade against the idle end (1), turn the shade, level the bottom rail with the other one (2). Release to fix the position (3). Not possible when using connector set.

Place the tube with plug connector on the aligner or connector set head.
Installation

Install the main roller shade with the coupling end cap.

Slide the aligner or the connector through the bracket into the idle end.

Press the tube bearing plug, lift the roller shade and snap it to the bracket.

Fix the outer bracket with the screws provided.

Only for coupling with 2 intermediate brackets! Fix the inner bracket (with mounted end cap) with the screws provided. Slide the aligner or the connector through the bracket into the idle end.

To align the bottom hembars, pull the shade away from aligner set (1), turn shade to line up bottom hembars together (2). Release shade to secure position (3). Not possible when using connector set.

Slide the cover cap onto the bracket until it snaps.

Place the tube adapter on the aligner or connector head.

Secure shade band by turning the locking ring on tube bearing plug furthest away from the bracket.
Slide the bracket cover onto the bracket. Make sure that the bracket cover snaps onto the bracket.

Option: Leveler

Make sure that the opening for the Allen key is pointing downwards before installing the brackets. Change the orientation by loosening the 4 screws and turning the leveler 90°. Reinstall the screws.

To adjust skewing, put the provided Allen key into the screw of the leveler and turn it left or right to move the roller shade up and down. Support lifting of large heavy roller shades with the palm of your hand.

Lift the backside of the end cap and slide it in your direction.

Unfasten the locking ring. Slide a screw driver between locking ring and bracket and push the idle end in the aligner direction.

Move the roller shade downwards out of the bracket. Pull the aligner or connector out of the idle end.
