HunterDouglasContract

Now more than ever, the ability to innovate defines success in architecture and design. Doing more with less, meeting and exceeding higher standards, and creating structures and infrastructures that enhance sustainability – both inside and out.

At Hunter Douglas Contract, we're continually developing product solutions that improve building performance and indoor environmental quality, while reducing environmental impact.

Our tradition of bringing breakthrough products to market makes us the company of choice for an array of contract solutions, including interior and exterior window coverings, acoustical and metal ceilings, solar control and façades.

Hunter Douglas Contract provides manual and motorized window coverings for the complete range of buildings: schools, offices, healthcare, retail locations, government/public buildings, and more. We offer the widest selection of shade styles, colors, and options in the industry, enabling designers to create a look that fits the specific requirements of their clients.

Our window coverings control light and conserve energy, helping to optimize indoor environmental quality for comfort, health, productivity, and sustainability.

Hunter Douglas Contract offers interior and exterior ceiling solutions for any application in a range of materials. As the worldwide leader in linear metal ceilings, we offer more products and options than any other manufacturer, along with cell, plank and tile systems. Our wood cross-over ceiling products offer similar variety and options, including solid wood, veneer, film, foil and wood-look powder-coat finishes for both interior and exterior applications. Hunter Douglas Contract's exclusive Techstyle® acoustical panels deliver both performance and aesthetics, highlighted by customizable Techstyle® Canvas panels with nearly unlimited options in colors and designs.

Solutions from Nysan Solar Control give architects the ability to meet the demands of cutting-edge buildings. No other source offers the complete range of solar control, from manual and automated roller shades, to light shelves and exterior shading systems, to fully integrated sun tracking and custom solutions.

Our external shading systems, tensile fabric structures and daylighting solutions are designed to maximize solar performance, while also making an understated or dramatic aesthetic contribution to the building appearance.

We have more than 40 years experience manufacturing ventilated façades – solutions that use air flow to help manage moisture and heat at the building envelope. With advanced materials and versatile, customizable support structures, Hunter Douglas Contract façades enhance the looks and performance of new or existing buildings.

Large-scale terracotta facade panels by industry leader NBK bring new dimensions to the building exterior.

Koda XT polycarbonate panels by 3form contain 40% recycled content and offer unprecedented design options with exterior-grade durability.
