

# GlacierScreen® Clear™ HD2001 / HD2003

## Clear (Twill Weave)

Twill-woven versions of GlacierScreen® Clear™ offer dual-tone construction that enhances solar reflectance in addition to providing the same crisp view-through, anti-microbial properties, and durability of the basket-woven versions.

## Fabric Colors

# GlacierScreen® Clear™ HD2001 / HD2003

GlacierScreen® Clear™ roller shade fabrics from Hunter Douglas Architectural offer exceptional view-through, long product life, and protection against bacteria and microbes.

## Key Features

- GREENGUARD Gold Certified.
- Dual-toned construction (light on one side, dark on the other).
- Free of heavy metals, phthalates, and brominated flame retardant material.
- Meets NFPA 701 standard for flame retardance.
- Proven silver nano sterilization - protection against bacteria, fungi, microbes, and viruses.
- Offers excellent glare control and view-through.

## Specifications

**Openness Factor:** HD2001 = 1%  
HD2003 = 3%

**Composition:** 18% Polyester, 82% PVC

**Standard Width:** 118"

**Roll Length:** 30 yd

**UV Blockage:** HD2001 = Approximately 99%  
HD2003 = Approximately 97%

**Fabric Thickness:** HD2001 = 0.024"  
HD2003 = 0.024"

**Fabric Weight:** HD2001 = 12.7 oz/yd<sup>2</sup>  
HD2003 = 12.4 oz/yd<sup>2</sup>

**Fire Classification:** NFPA 701-2010 TM#1,  
California U.S. Title 19
